

[Download](#)

This is a plugin that combines the ease of drag and drop with the power of fluid layout. It exposes hidden features in the area of [â€‹â€‹](#) layouts and allows you to control them by assigning indicators to the arrows of the layouts. In the layout options settings, you need to specify how

the moving arrow should look in each layout view. For example, to assign it a value for the interval 0-10-100, you need to set the parameter "9999-99FF". Selecting all the arrows called by any user is done by pressing Alt + F5 To select your arrow, you need to click the arrow icon in the Composer application To cancel a new task, put a cross next to the corresponding arrow
