A new type of twin-stick shooting! Immerse yourself in an atmospheric game, with a focused gameplay, dedicated levels, sophisticated artificial intelligence and a psychedelic soundtrack. Experience dual stick Puzzle in a hostile, dynamic environment, where the player must solve many puzzles and enemies are aware of the player's location Use of detailed physics. Original soundtrack, composed by Cristian Vogel and SS Gunver Ryberg. Autosave system, which allows you to save at any time. Collect coins for power-ups. Collect hidden letters. THOTH "presents a challenging gameplay puzzle, not necessarily for the action sequences, but for the need to study and solve the numerous steps necessary to make it to the next level. The first scenario provides several routes to solve puzzles and many layers to dodge enemy bullets. The second scenario is more oriented to require movement, dodging and understanding of the level's dynamics, as there are longer levels and moving objects, that require the player to master a great amount of possibilities, which are adapted to each level. THOTH presents a kind of mastery, where the difficulty rises with your level of skill, which requires both patience and reflexes. At the same time, the player is constantly challenged by the increasing number of enemies and by traps that need to be avoided. Moreover, the player can constantly use power-

ups to gain advantage or negate enemy attacks, and the player can further increase the difficulty of each level by collecting items." – Jeppe Carlsen, Creator of THOTH

In the winter of 2014, a small team was gathered by Jeppe Carlsen to start a new project for their studio, CR7 Games, founded in the summer of 2013. Their mission was to take their experience with Playdead's landmark game, LIMBO, and incorporate it into a new project. They wanted to create a game that was all their own, one that would tackle something different. To them, "something different" meant a twin-stick shooter with intense verticality and a heavy focus on puzzle solving. The team started working on the game and after many months of iteration and refinement, it was ready. The result was THOTH, an intensely challenging game that not only presents a different gameplay but a heavy focus on puzzle solving. The game was developed for the Windows platform and will be available for purchase on May 21st, 2015. Developed by: CR7 Games Studio Director: Jeppe Carlsen (codename: TH
