Game synopsis: You awake with no memory of who you are, where you are, or how you got there. As you try to piece together the events that have led to this waking moment, you are attacked by monsters and everyone seems to be trying to kill you. Read on to learn about the Five Great Powers, the different races and their history, and the world of TAS in Crusaders of the Lost Idols! Realm Select: To start the game, you have to select a Realm. You can choose from five realms: the Barony of the City, the Forest of the Forestlanders, the Plains of the Dwarves, the Jungle of the Jegudians, and the Land of the Nomads.

The Realm: The Barony of the City: The Barony of the City is a peaceful land, where a high-ranking merchant leads a team of adventurers to slay monsters and rescue maidens. It is a peaceful life of adventure and fortune, and the place where you were born! Forest of the Forestlanders: The Forest of the Forestlanders is a green land, where longhorn beasts run amok and roam free. The people are the descendants of the elves, and their life is one of peace and prosperity. Plains of the Dwarves: The Plains of the Dwarves is a wasteland of war and strife. The constant war between the peoples is exhausting and the land is in disrepair, ravished by the various warring factions. The people are relentless and the land is scarred by blood. Jungle of the Jegudians: The Jungle of the Jegudians is a well-trodden land of lush jungles and dense thickets. The one positive trait the people of this realm have is their creativity, with anything and everything in nature being possible. However, they lack the spirit to stand up to the horrors of this land. Land of the Nomads: The Land of the Nomads is a primitive land, where you are required to build the vast nomadic tribes and their quest for survival. The Nomads are skilled warriors, skilled trackers and can find their way through the most difficult of trails. But, their hearts are weak and their spirits are worn. You are the Crusaders of the Lost Idols! Your Story: You awaken with no memory of who you are, where

Features Key:

Brutal and innovative dark fantasy hack 'n' slash gameplay inspired by titles such as Dark Souls
Numerous "Skull Mode" dungeons, exclusive content and difficult traps
Powerful skills and weapons
An all-new character creator with modern graphics and astounding customization
Nightmare and Halloween inspired story mode

Crunching one demon or an ancient, intricately grotesque horror in the grindhouse style is easy. Not only to you move the action forward, but you control the growth of both character and combat equipment. With freedom to pause the game when you need breather or know your health situation, yet with harsh consequences should you decide to leave the screen. In between targets we show you both a helpful mini-map as well as an arcane system of bonuses and perils.

The game combines classic role-playing principles combined with modern action mechanics. To become a true hero, discover where the truth lies - in the marrowbones you eat, or in the skulls that help you to defeat monsters; in your effort to escape death, or in your ability to survive with the best equipment; and in your propensity to perceive reality, or sometimes in your unreliability. You will ultimately rely on your ability to properly wield your stamina and Vigor stat, build weapons and skills, manipulate items, coordinate and closely monitor your equipment - and even come to good terms with death.

●If you enjoy a puzzle where you can only move around and turn and click and solve problems, you will absolutely love this game!●You will find yourself going from page to page, grabbing what you need to make sure you are up to date and ready for whatever the latest challenge to be presented to you is.
●One thing I found fascinating, is that when you do not want to solve the current riddle, you can turn your back on it and return to the previous page, without having lost anything that was previously there. ●As I mentioned before, once you get used to the riddles, you will be so frustrated at the puzzle, that you will just have to make it through, even if it means you have to reread the instructions and have to figure it out again. ●You are not going to be able to win this game without using the dictionary or internet to find the word you are looking for, if you do not have access to either of those, you will lose at the beginning of the game. ●I do not think anyone can get frustrated enough to throw away their laptop or cell phone, so you might have to wait a little while until you find your way through this game. ●This game does not have the same number of riddles on each page as Crusaders of the Lost Idol 2, but the more difficult riddles can be purchased. ●Crusaders of the Lost Idol has riddles that are presented as being in a certain format, such as the answer will start with a certain word or have certain words in it, and you must match the letters on the riddle to the letter order of the words to make the answer.
●Crusaders of the Lost Idol 2 also has some riddles with a format, such as the answer will start with a certain word or have certain words in it, and you must match the letters on the riddle to the letter order of the words to make the answer. ●Crusaders of the Lost Idol 2 also has a series of puzzles that are more straightforward and a series that are a little bit more challenging. ●Crusaders of the Lost Idol has a series of "deeper" puzzles that require you to think harder about the numbers in a word to see if it makes sense, while Crusaders of the Lost Idol 2 only has one "deeper" puzzle. ●Crusaders of the Lost Idol 2 also has
