**Generic Low Latency Asio Driver 33 [EXCLUSIVE]**

---

while the launch of cs 5/6 was great, i'm a bit upset at how much has changed. i did my cursory search and seems like the latency issue is limited to half a dozen effects. which is a huge step forward. will this approach work in vst hosts that do not provide the i/o layer drivers? i would guess that we could work this out on our own via vst hosts code and i wonder if steinberg will ever let us release that code or incorporate it into their products. thanks, sean on tue, may 25, 2020 at 5:14 pm justin stanford

justin@macosxhacks.com wrote: how would you go about creating a universal asio driver for multiple soundcards, and even for other virtual devices, such as input jacks that are attached to the host machine? that is, i assume asio4all would need to be updated, and drivers in the new release would not have the 32bit/64bit binary distinction. i wish i could link the current description in the documentation to the new driver. as we know, cubase is of native origin and does not have native support. i notice asio4all states that all drivers are required to be signed with a digital signature (vs 2003 and later). if i go to win 7 i select all present and valid and i get the third item: signature of the publisher is not valid. now i assume, if there is a way of signing just certain drivers. at least they could be enabled manually in a version control system. i think there is someone in charge of this in the steinberg community. then we could use this as a workaround to enable native support in our every day development. other than this a less workable solution is that we have to individually update all drivers until these crashes are not happening anymore. at the moment i tried to compile the new asio drivers for cubase and get back: lang=en\_us.iso8859-1:\$lang'" \$asio\_ver\_'" asio\_dir\_'" no rules found matching "asio\_dir\_".ruleset'"'"' for architecture "x86\_64" the quality is of course lower than in windows but

---

it's still a stable version of the asio drivers.
