V For Vendetta Hindi Audio Track

In 2014, a hacking group calling themselves Hack V for Vendetta claimed responsibility for breaking into Fox's corporate website and replacing the Windows logo with an image of Moore's face with the words "DC Doesn't Give A Fuck" written underneath. Moore described the hack as a "stupid, vain, ugly move" and added that "I hope people don't think this is related to V For Vendetta, because that is not the case." In 2014, a film adaptation of V for Vendetta was in development at Warner Bros. with director Eric Fellner, producer Joel Silver and screenwriter Akiva Goldsman. Furthermore, in June 2014, at the inauguration of the United Nations Office in Kosovo, one of the logos included for the event featured the likeness of V. In response, the US Department of State expressed the US government's support for the Serbian government. V For Vendetta (2005) opens with a voicemail message from the British Secret Service received by a London phone booth vendor. It is from an agent named Nicholas Merchant, who instructs the vendor to take a message and pass it on to a computer expert, who answers when the caller asks to be put through. Upon doing so, the call is connected to an underground hideout. The voice on the other end assures Merchant that the message is secure and instructs him to drop in on the following day. As he exits the phone booth, an anarchist bursts from the shadows and shoots him, forcing him to chase and grab the assassin, who is revealed to be V. V and his anarchist accomplices take control of the community, a police station and the media. V is depicted as a figure with no fixed facial features, and the ability to blend in with the public, making it difficult to capture him. He has also demonstrated the ability to communicate with computers and to use other people's identities to enact his ideas. 5ec8ef588b
