Can someone please help me with some advice? I have a simple form in which a user can type a name, a number, and a product. If the user enters a name, and the name does not match a word or an existing product number that has been entered, they will receive an error message. This is my code so far. Form function valid(form) { var name = form.name.value; var name1 = document.getElementById('name').value; var product = document.getElementById('product').value; var product1 = document.getElementById('product').value; var number = document.getElementById('number').value; var number1 = document.getElementById('number').value; var name = name.toLowerCase(); var name1 = name1.toLowerCase(); var product = product.toLowerCase(); var product1 = product1.toLowerCase(); var number = number.toLowerCase(); var number1 = number1.toLowerCase(); if (name = "sunshine") {

However the heroku logs command is not showing anything to indicate the signal. I need to handle this signal to take some action upon creation of a new version of the app. My question is: Is there a way to make sure that this signal gets emitted 79a2804d6b
